The strengthening starts at home: Parent-child relationships, psychological capital, and academic performance – a longitudinal mediation analysis.

By: Carmona-Halty, Marcos; Salanova, Marisa; Schaufeli, Wilmar B. • In: Current Psychology, Jun2022 • Cited by: 38

This longitudinal study examines how academic psychological capital mediates between parent-child relationships and academic performance in a group of high school students. The sample consisted of 402 students (217 girls and 187 boys) aged between 12 and 17 years. Using a three-wave longitudinal design, the study found that parent-child relationships and psychological capital both predict academic performance, and the relationship between parent-child relationships and academic performance is mediated by psychological capital.

Insights

- Soil aeration techniques, such as micro-nano bubble aeration and underground air layer treatments, significantly increase soil oxygen concentration and decrease carbon dioxide concentration, which positively impacts tomato fruit yield.
- Enhanced soil aeration improves root morphology and root extract concentrations, leading to better root activity and overall plant health, which are crucial for higher tomato yields.
- Soil aeration alters nitrogen cycling, increasing nitrate (NO₃-N) concentration and decreasing ammonium (NH₄⁺-N) concentration, which benefits nutrient availability for tomato plants.
- Optimal soil moisture levels, specifically between 60%-90% field capacity, combined with appropriate aeration treatments, are recommended for maximizing tomato yield and maintaining soil health.
- The underground air layer treatment is more effective for long-term cultivation, while the micro-nano bubble aeration treatment is suitable for short-term tomato production, based on the study's findings.

Consumer Response to Climate Change: Wildfire Smoke and Sustainable Product Choice.

Published in: Journal of Marketing Research (JMR), Dec2025, Business Source Premier

By: Lim, Taewook; Kim, TI Tongil; Kim, Suh Yeon

Global warming has increased the frequency and intensity of extreme climate change events. The authors study the impact of severe climate change events, particularly wildfire smoke, on consumer purchases of sustainable products. They exploit the random dispersion of wildfire smoke as a natural experiment and analyze three large-scale wildfires from 2018, 2020, and 2023. They combined retail scanner data with air quality data for the first two events and conducted online surveys for the last event. They show that stores exposed to severe wildfire smoke experience an increased demand for sustainable cleaning products relative to stores facing little to no wildfire smoke. The increase occurs promptly after the wildfire smoke exposure, which is short-lived. The authors also find stronger effects for refill products and sustainable brands. Survey results corroborate and extend the empirical findings by demonstrating the effect of exposure on attitudinal changes. In summary, this study documents the meaningful impact of climate change events on sustainable consumption by analyzing multiple events over the years using a multimethod approach. The study offers relevant and timely managerial insights as consumers are increasingly exposed to more intense and recurrent climate change events.

Keywords: global warming; climate change; wildfire smoke; sustainability marketing; sustainable development goals; natural experiment; causal inference; multimethod

Since the 1800s, human activities have increased the amount of carbon dioxide in the air,

dish soap, all-purpose cleaners, and laundry detergents. This change in consumer purchases occurs promptly after the wildfire smoke exposure but is short-lived, underscoring the transient nature of the consumer response.

We also observe heterogeneous wildfire smoke effects based on product, brand, and store characteristics. Refill and unscented products show stronger responses to wildfire smoke. Brands with more sustainable products also experience a greater increase in demand. In contrast, stores with higher shares of sustainable products experienced smaller impacts, suggesting possible saturation effects. This pattern indicates that customers at these stores were likely already environmentally conscious and engaged in sustainable consumption before encountering severe climate events. Although the heterogeneous effects based on unscented products and sustainable stores are not robust in the 2020 wildfire analyses—likely due to the COVID-19-pandemic-related factors—we present these findings, as the 2018 results are considered more reliable and generalizable because they are based on prepandemic data.

The findings from the surveys conducted during and after the 2023 Canadian wildfires provide further insights into consumer attitudes toward sustainable consumption. Our findings indicate that exposure to wildfire smoke increases environmental and health concerns that are associated with consumer purchases. In addition, we observe a significant increase in the willingness to purchase and beliefs regarding climate change and global warming for those who are more exposed to wildfire smoke. However, these attitudinal shifts dissipate within a year. Our survey findings corroborate and extend our findings from the scanner data from the two other wildfires and further demonstrate that severe wildfire smoke drives both behavioral and attitudinal shifts toward sustainable consumption.

AI Ask beta

Ask this document

Summary of Document

Main Topic: This document examines how exposure to wildfire smoke influences consumer choices toward sustainable products.

Key Points:

- Wildfire smoke exposure increases willingness to buy sustainable products, but this effect is short-lived 1 2 3 .
- Consumers exposed to smoke show stronger beliefs in climate change and greater environmental and health concerns 4 1 .
- The impact varies by product type, with refill and unscented products showing stronger responses 2 3 .

Why It Matters: Understanding how extreme climate events affect consumer behavior is crucial for businesses and policymakers aiming to promote sustainability. The study shows that while climate events can temporarily boost sustainable consumption, long-term strategies are needed to maintain these behaviors 2 3 .

what does Yst stand for?

In the document, Y_{pst} represents the number of bottles sold for product (UPC) p at store s in month t 1 .

This variable is used in the UPC-store-level analyses to measure product demand and estimate the effects of wildfire smoke exposure on sustainable product consumption 1 2 .

At the bottom of the main content area, there is a text input field labeled "Ask a research question...".

How have GLP-1s changed the weight loss industry?

How GLP-1s Have Transformed the Weight Loss Industry

GLP-1 medications have fundamentally reshaped the weight loss landscape through widespread adoption, industry adaptation, and significant economic implications:

1. Market Adoption and Prevalence

- Approximately 11% of Americans are now taking GLP-1 medications for weight loss, with about 6 million adults in the U.S. currently using these drugs like Ozempic and Wegovy ¹
- The FDA has approved multiple GLP-1 pill formulations, including Novo Nordisk's Wegovy pills and Eli Lilly's Foundayo pills, expanding treatment options beyond injectable forms ²

2. Impact on Food and Consumer Behavior

- GLP-1 users are consuming significantly fewer calories and shifting away from processed foods and sugars, leading to decreased grocery spending among those taking the medications ³
- Food companies are adapting their strategies by offering smaller portion sizes and more nutritionally dense options to meet the changing preferences of GLP-1 users ⁴
- Interestingly, GLP-1 users are increasing their consumption of gum, mints, and protein bars—with Hershey's Ice Breakers brand seeing 8% sales growth and protein bar

What is the best treatment for outpatient...

What is the best treatment for outpatient with HFrEF who is not on medication?

What is the best initial outpatient treatment regimen for a patient with heart failure with reduced ejection fraction (HFrEF) who is not currently on any medications?

- **Initial core regimen (adult outpatient with symptomatic HFrEF, no prior therapy, no contraindications):**
Start all 4 guideline-directed medical therapy (GDMT) classes as early as feasible: an RAS inhibitor (ARNI preferred over ACE inhibitor or ARB), a beta blocker (bisoprolol, carvedilol, or metoprolol succinate), a mineralocorticoid receptor antagonist (MRA: spironolactone or eplerenone if GFR > 30 mL/min/1.73 m² and K < 5 mEq/L), and an SGLT2 inhibitor (dapagliflozin, empagliflozin, or sotagliflozin).^{1,2,3}
- **Typical first-line drug/dose choices:**
 - Sacubitril/valsartan 24/26–49/51 mg twice daily, uptitrated to 97/103 mg twice daily as tolerated.²
 - Carvedilol 3.125 mg twice daily (or metoprolol succinate 12.5–25 mg once daily, or bisoprolol 1.25 mg once daily), uptitrated toward target doses.²
 - Spironolactone 12.5–25 mg once daily (or eplerenone 25 mg once daily), uptitrate as tolerated.²

Journal Page – Author Instructions

The screenshot displays the 'Journal of Fluid Mechanics' website. At the top, the journal title is centered, with social media icons (Twitter, Facebook, LinkedIn, RSS) on the right. Below the title is a search bar with the placeholder text 'Search Journal of Fluid Mechanics' and a magnifying glass icon. A checkbox labeled 'Search within full text' is checked. Below the search bar are four buttons: 'Submit your article', 'Announcements', 'Subscribe', and 'Recommend to librarian'. A navigation bar below these buttons includes links: 'Journal home', 'Journal information' (highlighted with a blue underline), 'Latest issue', 'All issues', 'Focus on Fluids', 'JFM Rapids', 'JFM Perspectives', 'Open access articles', and 'Most read'. On the left, a sidebar menu is highlighted with a green rounded rectangle. It contains the following items: 'About this journal' (with a downward arrow), 'Author instructions' (with an upward arrow), 'Fees and pricing', 'Preparing your materials', 'Submitting your materials', 'Publication process after acceptance', 'Publishing agreement', and 'Post publication impact'. The main content area is titled 'About this journal' and features a cover image of the journal. To the right of the image, the text reads: 'Journal of Fluid Mechanics', 'ISSN: 0022-1120 (Print), 1469-7645 (Online)', 'Frequency: 24 volumes per year', and a paragraph describing the journal as the leading international journal in the field. A 'Feedback' button is located at the bottom right of the main content area.

About this journal

Journal of Fluid Mechanics

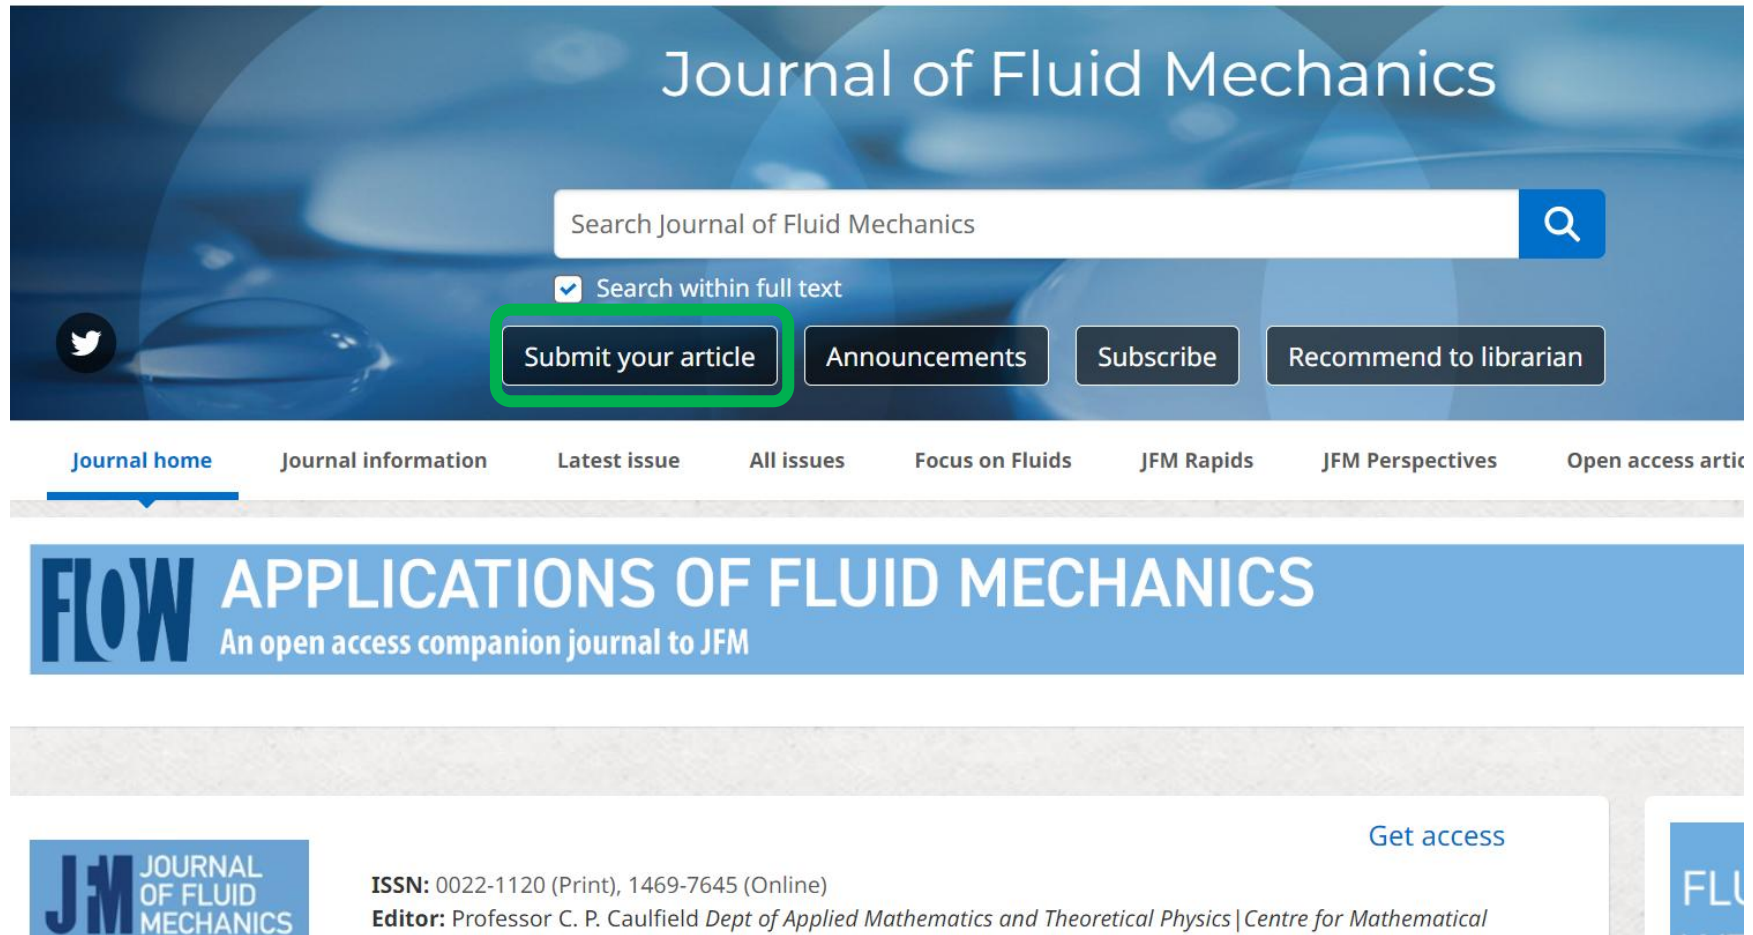

ISSN: 0022-1120 (Print), 1469-7645 (Online)

Frequency: 24 volumes per year

Journal of Fluid Mechanics is the leading international journal in the field and is essential reading for all those concerned with developments in fluid mechanics. It publishes authoritative articles covering theoretical, computational and experimental investigations of all aspects of the mechanics of fluids. Each issue contains papers on the fundamental aspects of fluid mechanics and its applications to other fields such as aeronautics, astrophysics, biology, chemical and mechanical engineering, hydraulics, materials, meteorology, oceanography, geology, acoustics and combustion.

Manuscript decision

- Upon acceptance, authors must complete an author publishing agreement (APA).
- **This is the key decision point for the author to make their article OA.**
- Authors must complete a Gold Open Access agreement and select a creative commons license.
- A record will then be created in Cambridge's production tracking system.

Author publishing agreement

Before Cambridge University Press can publish a journal article (or any other journal content type) we need a signed licence to publish. To find the right form, start by considering whether or not your article will be published as open access or non-open access and then select the most appropriate option.

Non-Open Access Articles

So that we have the necessary rights to publish your article, we ask you to grant an exclusive licence to publish. (We do not ask you to transfer your copyright to us.) An exclusive licence means that the rights needed to publish the article are granted to the journal owner on exclusive basis and the ownership of the copyright remains unchanged. Select the correct form from the choice of three:

Who are you and who owns the copyright?	Correct Forms	Who Signs?
I am the sole author and I own the copyright in the article OR I am one of two or more authors and we jointly own the copyright in the article		One author
I am the sole author and my non-government employer owns the copyright in the article OR I am one of two or more authors and one or more of our non-government employers jointly own the copyright in the article		Each author and each employer
I am the sole author and my government employer owns the copyright in the article OR I am one of two or more authors and one or more of our government employers jointly own the copyright in the article		Each author and each employer

Open Access Articles

So that we have the necessary rights to publish your article, we ask you to grant a non-exclusive licence to publish. (We do not ask you to transfer your copyright to us.) A non-exclusive licence means that the rights needed to publish the paper are granted to the journal owner on a non-exclusive basis and the ownership of the copyright remains unchanged. Select the correct form from the choice of two in the table below.

In open access there is a fundamental principle that content should not only be accessible but also be freely reusable for the good of research and humanity. We comply with this principle by asking you to select, within your form, a [Creative Commons licence](#). The CC licence you choose will determine how readers can use your article.

Who are you and who owns the copyright?	Correct Forms	Who Signs?
I am the sole author and I own the copyright in the article OR I am one of two or more authors and we jointly own the copyright in the article		One author
I am the sole author and my employer (government or non-government) owns the copyright in the article OR I am one of two or more authors and one or more of our employers (government or non-government) jointly own the copyright in the article		Each author and each employer

Manuscript decision

Licensing process with an **improved digital licensing solution** that will allow us to improve author experience and our ability to channel authors to select the gold OA publishing option in hybrid journals, using specific messaging relating to Read and Publish.

Third Party Transaction Process

- We work with *Rightslink*[®]-CCC to process article processing charges (APCs).
- Institutions and authors participating in Read and Publish deals benefit from *Rightslink*'s tool, **OA Agreement Manager**, which has been purpose-built to facilitate smoother financial transactions for authors and administrators.
- This allows us to identify authors who are eligible for an APC discount/waiver and automatically apply a discount, meaning a **'touch free' journey for the author**.
- Institutions may also review and authorise APC funding requests.

Touch Free Transactions

- Once an author has completed their OA licensing agreement, the *Rightslink*® transaction process is triggered.
- **Authors affiliated to an institution with an R&P deal do not interact with the transaction process.**
- *Rightslink*® match the article with a publishing agreement and automatically discount the APC.

Touch Free Transactions

A notification will still be sent to the author to confirm the APC discount has been approved and applied, and that their article will be published OA.

Your article has been accepted and will be published open access

Dear [REDACTED],

Congratulations on being accepted for publication in [REDACTED] for the following manuscript:

European Heart Journal

 **ESC**
European Society
of Cardiology

The *European Heart Journal* is an international, English language, peer-reviewed journal dealing with cardiovascular medicine. It is an official journal of the [European Society of Cardiology](#) and is published weekly.

The *European Heart Journal* aims to publish the highest quality material, both clinical and scientific, on all aspects of cardiovascular medicine. It includes articles related to research findings, technical evaluations, and reviews. In addition it provides a forum for the exchange of information on all aspects of cardiovascular medicine, including education issues.

In addition to publishing original papers on all aspects of cardiovascular medicine and surgery, the journal also features reviews, clinical perspectives, ESC Guidelines, and editorial articles about recent developments in cardiology as well as encouraging correspondence from its readers.

None

Proceed

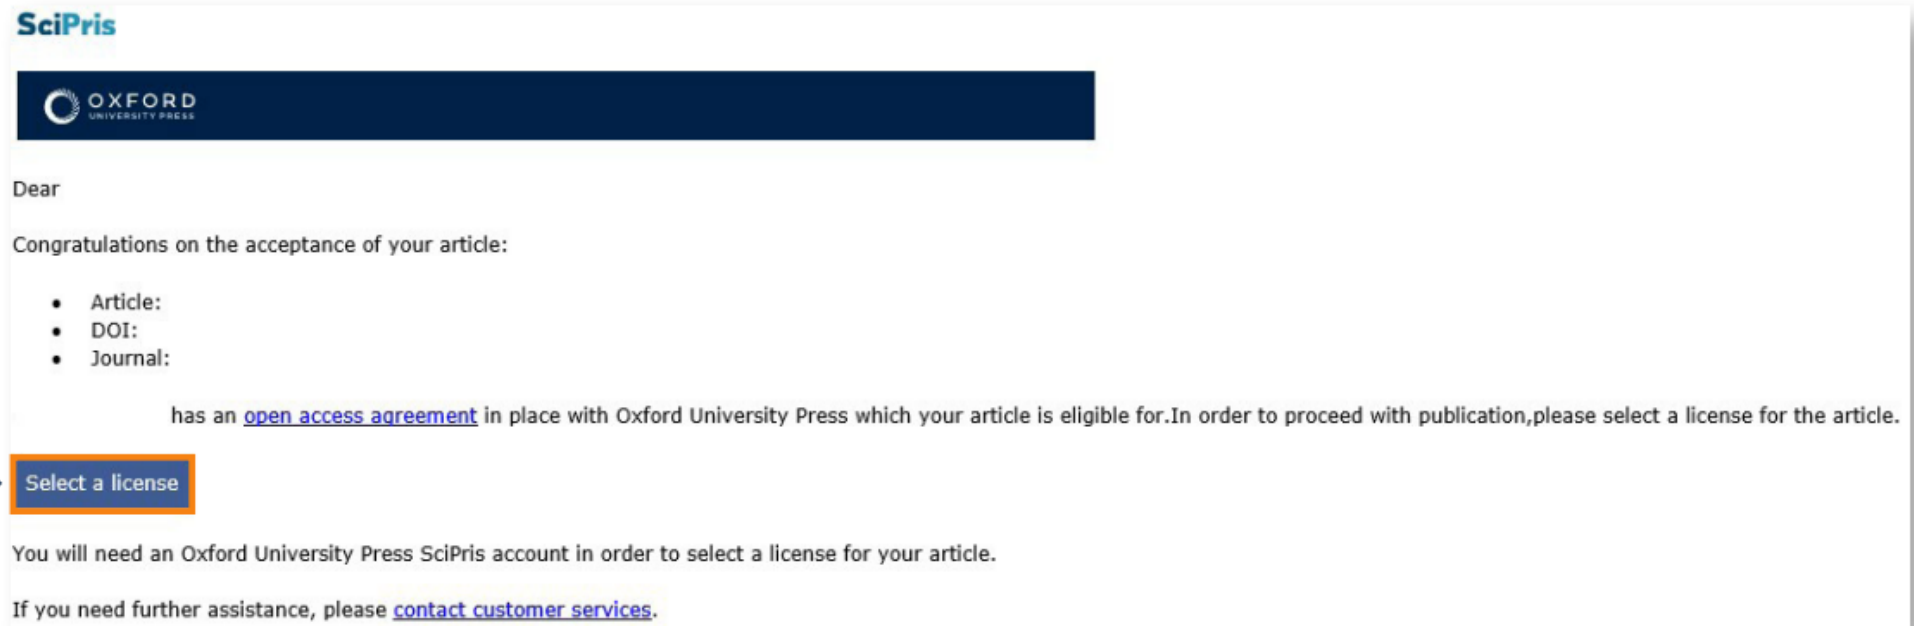

SciPris

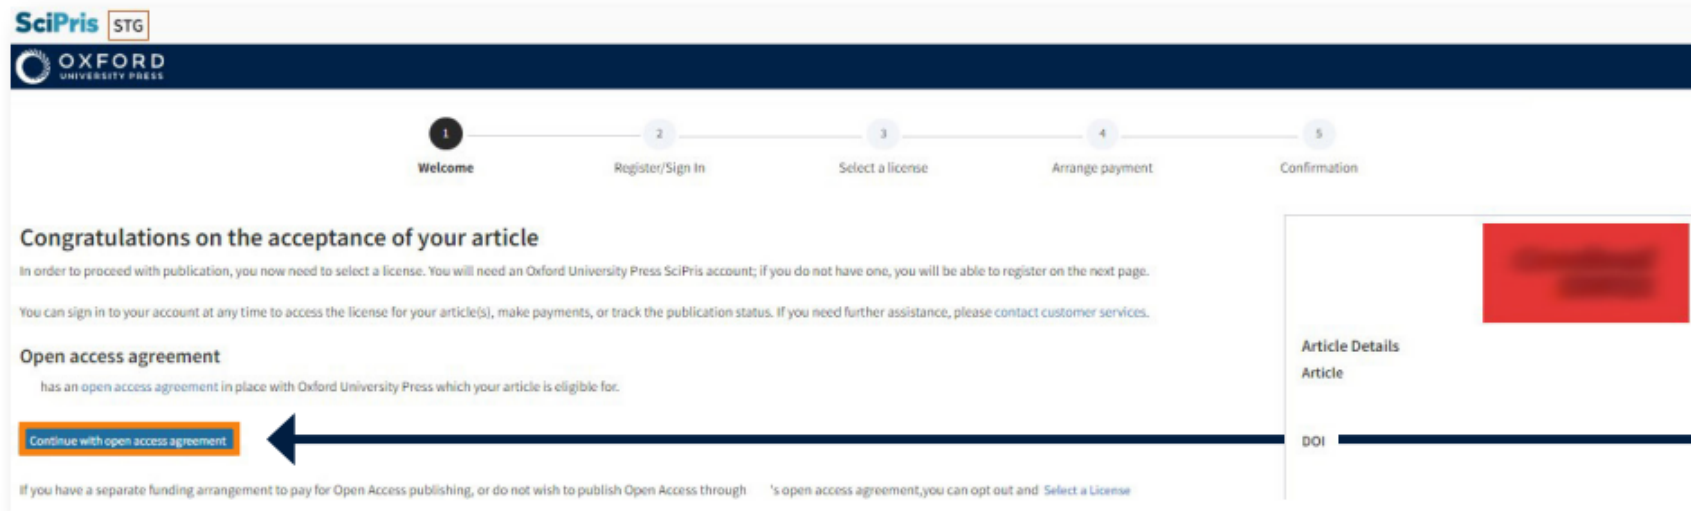

Author Workflow

1. Once your article has been peer-reviewed and accepted for publication, you will receive an email which contains a link to the Online Licensing and Payments System, SciPris.

SciPris will check your institutional affiliation and article type to determine if you are eligible to use the funds.

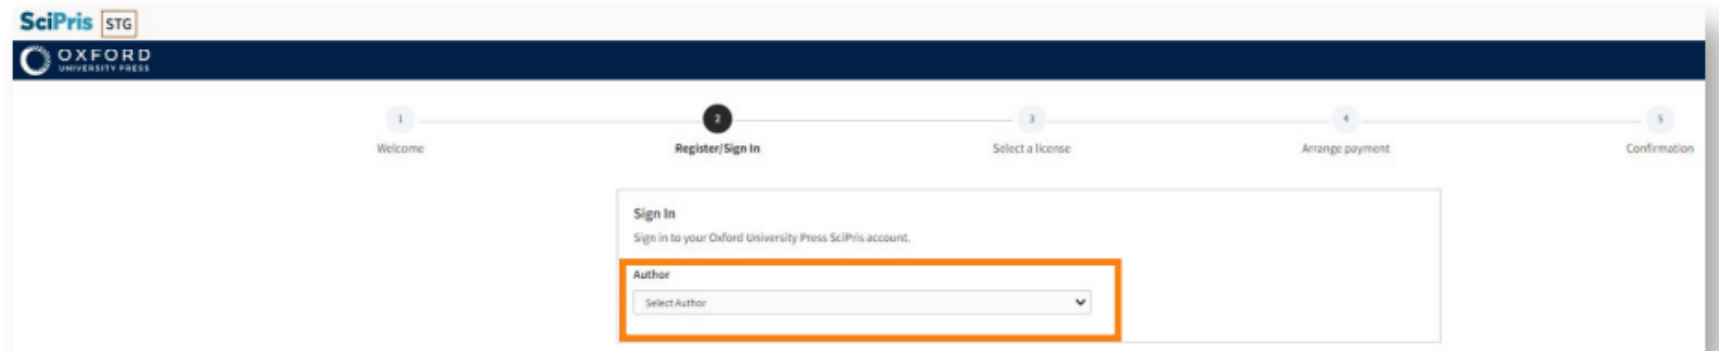

2. Proceed to request use of the Read and Publish Agreement funds.

The screenshot shows the SciPris STG Oxford University Press interface. At the top, there is a progress bar with five steps: 1. Welcome, 2. Register/Sign In, 3. Select a license, 4. Arrange payment, and 5. Confirmation. Below the progress bar, the main heading is 'Congratulations on the acceptance of your article'. A subheading reads 'Open access agreement'. A blue button labeled 'Continue with open access agreement' is highlighted with an orange border. A large blue arrow points from this button towards the right, where an orange box contains the text 'Click 'Continue with open access agreement''. The interface also includes a sidebar on the right with 'Article Details' and 'Article' sections, and a 'DOI' field at the bottom.

Click 'Continue
with open access
agreement'

3. Sign in and create an account if you don't have one. (This is not the same system you used to submit your article to the journal.)

5. Send the request for review.

The screenshot shows the SciPris STG payment interface. At the top, there is a header with the SciPris STG logo and the Oxford University Press logo. Below the header is a progress bar with five steps: 1. Welcome, 2. Register/Sign In, 3. Select a license, 4. Arrange payment (highlighted with a black circle), and 5. Confirmation. The main content area is titled "Arrange Payment" and contains the text: "Please confirm you would like to request payment through the open access agreement. If you would like to pay by another method, please contact customer service." Below this text is a blue button labeled "Submit request". On the right side of the page, there is a red rectangular placeholder for an image, and below it, the text "Article Details" and "Article".

6. View your dashboard or sign out.
